**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 10, and 20-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Barton (6,501,195).

Barton clearly discloses a method and an apparatus for causing at least one secondary device to become energized or de-energized substantially simultaneously with a primary device through the use of an electrical power strip device of the type having at least one switched and one unswitched outlet, adapted to receive an electrical power cord plug, a voltage power tap for sensing the presence or absence of an operating voltage of the primary device, and a switch connected to the voltage power tap for selectively supplying or depriving electrical energy from an external electrical energy source to the at least one switched outlet upon sensing the presence or the absence, respectively, of the operating voltage from the voltage power tap. The claimed phrase “the voltage power tap is supplying a voltage that is greater than zero, but less than a voltage of the external electrical energy source” clearly reads on voltage across the current sensing resistor created by the primary device of Barton. See column 3, lines 15-28 and figure 1.

*Allowable Subject Matter*

3. Claim 19 is allowed.
4. Claims 2-9, 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
